

WIRELESS FIELD STRENGTH TESTER

With
Log Periodic
Antenna

**Model
ZC 300**

Detects Bugs & Hidden Cameras

Identifies Hot & Cold spots

Discovers hacker-site locations

Directional signal measurements

For wireless - security installations

Locates cable leaks & connector problems

FOR USE AT 5.8, 5.2, 3.5, 2.4, 1.2, & 0.9 GHz

1 MHz to 8 GHz Bandwidth

MEASURES WEAK SIGNAL LEVELS

5.8 & 2.4 GHz mW signals measured at 30+ feet

SELECTABLE ANTENNA OPTIONS

- **COAXIAL INPUT** - For frequency-specific directional antennas & filters, aiming & aligning RF signal links
- **FIXED INTERNAL ANTENNAS** - No adjustments needed

LOG - MID - LINEAR DETECTION MODES

Detects weakest signals from a distance & pinpoints their location

DIGITAL / ANALOG SIGNAL DIFFERENTIATION

Enhanced cell Phone , video, computer data & pulsed signal detection
